Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Saturday 15 May 2021

UK Outlook for Sunday 30 May 2021 to Sunday 13 Jun 2021:
Confidence is low for this period, typical of Spring and early Summer. It is likely for conditions to remain changeable with showers at first, but probably becoming more settled with an increasing likelihood of drier conditions for many places. Temperatures possibly recovering to nearer average but with more settled conditions bringing some warmer days, and some cooler nights remain possible.
